## ACC1/ACC-alpha Antibody

Rabbit Polyclonal

Antigen Affinity Purified Protein ID NP\_942131.1

Catalog No. A300-986A GeneID 31

Lot No. A300-986A-1

APPLICATIONS IP

SPECIES REACTIVITY Human

**PRESUMED REACTIVITY** Based on 100% sequence identity, this antibody is predicted to react with Mouse and Rat

AMOUNT 100 μl

CONCENTRATION 1000 μg/ml

**STORAGE/SHELF LIFE** 2 – 8° C / 1 year from date of receipt

PHYSICAL STATE Liquid

**BUFFER** Tris-citrate/phosphate buffer, pH 7 to 8 containing 0.09% Sodium Azide

ISOTYPE IgG
ORIGIN USA

**PRODUCTION** Antibody was affinity purified using an epitope specific to ACC1/ACC-alpha immobilized on

**PROCEDURES** solid support.

The epitope recognized by A300–986A maps to a region between residue 1925 and 1975 of human acetyl-Coenzyme A carboxylase alpha using the numbering given in entry NP\_942131.1

(GeneID 31).

Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm

of 1.4 equals 1.0 mg of IgG.

**APPLICATIONS** Centrifuge tube to remove product from lid. Optimal working dilutions should be determined

experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot Not recommended. Use rabbit anti-ACC1/ACC-alpha antibody A300-

987A.

Immunoprecipitation  $2 - 5 \mu g/mg$  lysate

**APPLICATION NOTES** Western blot of immunoprecipitates performed using Normal Pig Serum (Cat. No. S100–020),

Goat anti-Rabbit Light Chain HRP Conjugate (Cat. No. A120-113P) and 4-8% SDS-PAGE

(link to IP-western blot protocol in Additional Info section below).

Date: June 21, 2019

Detection of human ACC1/ACC-alpha by western blot of immunoprecipitates. *Samples:* Whole cell lysate (1 mg for IP, 20% of IP loaded) from HeLa cells. *Antibodies:* Affinity purified rabbit anti-ACC1/ACC-alpha antibody A300-986A used for IP at 3 μg/mg lysate. ACC1/ACC-alpha was blotted using rabbit anti-ACC1/ACC-alpha antibody A300-987A, which recognizes a downstream epitope. For blotting immunoprecipitated ACC1/ACC-alpha, A300-987A was used at 1 μg/ml. *Detection:* Chemiluminescence with an exposure time of 3 minutes.
