Product Information

Product ID G3357

CAS No. 15291-76-6

Chemical Name (1 α ,7 β)-1,7-Dihydroxyginkolide A

Synonym BN-52022

Formula C₂₀H₂₄O₁₁

Formula Wt. 440.40

Melting Point -300°C(dec.)

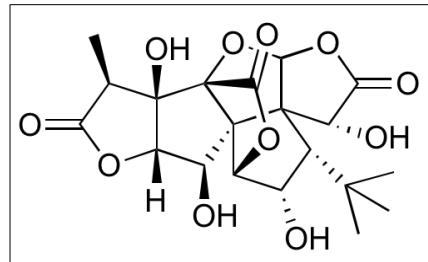

Purity ≥98%

Solubility Insoluble in water. Soluble in DMSO.

Store Temp -20°C

Ship Temp Ambient

Description Ginkgolide C is a diterpene lactone found in *Ginkgo*; it exhibits anticoagulant, neuromodulatory, and antioxidative activities. Ginkgolide C increases levels of matrix metalloproteinase 9 (MMP9), cAMP, and cGMP, suppresses production of thromboxane A2 (Tx_A2), and inhibits platelet aggregation in vitro. Ginkgolide C inhibits GABA-A receptors, α-1 glycine receptors, and PAF receptors. In cellular models, ginkgolide C inhibits formation of superoxide and hydroxyl radicals.

Bulk quantities available upon request

Product ID Size

G3357 10 mg

G3357 25 mg

G3357 50 mg
