

# Unlock the Potential of your Research with Biomol!

## About the Biomol Products

The Biomol brand covers a diverse range of products that cater to various scientific areas, providing you with the best solutions for your research. Our product line comprises more than 900 products, including selected biochemicals, activity-tested cytokines and essential tools for molecular biology.

Benefit from the dual advantage of high quality and cost efficiency. True to our motto „You have the vision, we have the substance“, we bring researchers and products together to meet the needs of the life science community.

**YOU HAVE THE VISION,  
WE HAVE THE SUBSTANCE.**

*BSA, Fraction V (#01400)  
Dithiothreitol (DTT) (#04010)  
HEPES, sodium salt (#50432)*

## Biochemicals

Explore the world of our biochemicals and take advantage for your research. From Bovine Serum Albumin for protein stabilization over the detergent abilities of Sodium Dodecyl Sulfate to HEPES for optimal cell culture buffering: Our diverse selection of biochemicals is designed to fulfil the evolving demands for scientists across a variety of research areas and applications.

Cat #	Product Name	Available Sizes
01400	Bovine Serum Albumin (BSA), Fraction V	100 g • 250 g • 500 g • 1 kg
04010	Dithiothreitol (DTT)	5 g • 10 g • 25 g • 100 g
04051	Sodium Dodecyl Sulfate (SDS), pure	1 kg
50311	Dodecyl-beta-D-maltoside (min. 99%)	1 g • 5 g • 25 g
50432	HEPES, sodium salt	100 g • 1 kg
50429	MOPS, sodium salt	100 g • 1 kg
08003	Tris, ultra pure	500 g • 1 kg • 2.5 kg
22870	Tricine, ultra pure	100 g • 500 g • 1 kg

## Cytokines

Experience the power of Biomol's activity-tested cytokines. Whether studying cell proliferation, tissue repair or differentiation, our products provide you with the tools needed to dissect complex signaling cascades.

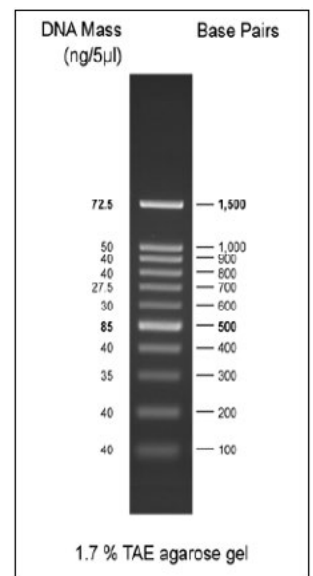

Cat #	Product Name	Available Sizes
50349	Epidermal Growth Factor, human recombinant	100 µg • 500 µg • 1 mg
54299	Bone Morphogenetic Protein-2, human recombinant	2 µg • 10 µg • 1 mg
50442	Interleukin-2, human recombinant (rHuIL-2)	10 µg • 50 µg • 1 mg
51564	Interferon gamma, human recombinant	20 µg • 100 µg • 1 mg

## Molecular Products

Embark on molecular precision with DNA ladders and protein markers for accurate measurements. Our commitment to molecular exactness is evident in every DNA-related product.

Cat #	Product Name	Available Sizes
10002	100 bp DNA Ladder 1, ready-to-use	500 µl
10003	100 bp DNA Ladder 2, ready-to-use	500 µl
10008	BLUEplus prestained Protein Ladder (10-180 kDa)	500 µl
01280	Agarose, high electroendosmosis	25 g • 100 g • 1 kg
